↓

Smart Document Import

Drop Vanguard PDFs or IBKR CSVs. AI extracts every holding, transaction, and price. Auto-detect, preview, confirm, undo. Re-import is idempotent.

☰

Unified Dashboard

Total portfolio value, month-over-month change, per-account cards, and equity curves. Drill into any account for holdings, transactions, and snapshots.

Σ

FIFO Tax Lot Tracking

Automatic cost basis matching. Open lots with unrealized gains, closed sales with long/short-term classification. Year and account filtering.

✱

AI Portfolio Analyst

Streaming chat with Claude and 14 tools. Queries your actual data: holdings, allocations, tax lots, performance, FRED data, SEC filings, insider trades.

■

Factor Analysis

Break down your portfolio across 9 dimensions: sector, geography, market cap, style, asset class, and more. Concentration metrics with HHI scoring.

Δ

Performance Metrics

Time-weighted return (TWR) via chain-linked Modified Dietz. Per-account breakdown. YTD, 1Y, and full-history periods.

✎

Investment Journal

Journal entries, earnings notes, and trade theses linked to holdings. Sentiment tags, full-text search, and earnings transcript timeline.

■

Live Market Data

Connect to IBKR Trader Workstation for real-time prices and security enrichment. Built-in rate limiter. TWS prices are authoritative.

✓

Reconciliation

Compare broker statement values against computed values. Flag discrepancies. Data quality annotations for staleness, missing data, maturity.

Import Formats

- **Vanguard PDF Statements**
Claude API extraction with retry. Stocks, bonds, ETFs, options, mutual funds.
- **IBKR Activity CSV**
Section-based parsing. Trades, dividends, interest, fees, options (OCC symbols).
- **IBKR Holdings CSV**
Current positions with cost basis and market prices.
- **Vanguard Holdings CSV**
Point-in-time position snapshots.
- **Vanguard Cost Basis CSV**
Per-lot cost data with method (FIFO, specific ID).
- **Monthly Values CSV**
Aggregate portfolio snapshots for performance tracking.

AI Chat Tools (14)

Portfolio Data

query_holdings, query_transactions, query_allocation, query_tax_lots, query_performance, query_income_summary, query_twr, query_price_history

External Data

query_fred (macro indicators), query_company_fundamentals (SEC EDGAR), query_insider_trades (Form 4)

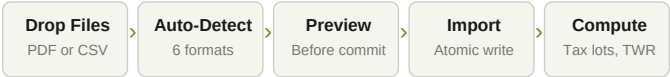

Research

query_earnings_transcript (EDGAR → Motley Fool → API Ninjas), query_notes, create_note

Compute Engines

- **FIFO Tax Lots**
Matches BUY/SELL transactions. Tracks holding periods, long/short-term, unrealized and realized gains.
- **TWR (Modified Dietz)**
Chain-linked monthly returns. Annualized. Measures portfolio performance independent of cash flows.
- **XIRR (Newton-Raphson)**
Money-weighted return. Accounts for timing and size of deposits/withdrawals.
- **Security Classification**
Static lookup + auto-classify. 9 dimensions: sector, geography, cap, style, asset class.

Data Flow

Architecture

Framework	Next.js 16 App Router — server components for data, client f...
Database	SQLite (WAL mode, foreign keys) — single file, zero config,...

What Makes It Different

- **Truly Local**
Your financial data never leaves your machine. No cloud, no accounts, no third-party access.
- **Multi-Brokerage**
Unified view across Vanguard and IBKR with a single import flow.
- **AI-Native**
Deep, structured access to your data through 14 specialized query tools.
- **Tax-Aware**
FIFO cost basis with long/short-term classification and harvesting discovery.
- **Institutional Metrics**
TWR and XIRR computed the way endowments measure performance.
- **Idempotent Imports**
Re-import the same file 10 times — nothing changes. Deterministic keys.
- **Full Audit Trail**
Every import tracked as a batch with undo. Reconciliation verifies values.
